**VIRTUA¹
EVENT2021**

22-24 June 2021 //////////////////////////////////////

Guided tour of the event platform

Access to the event platform

You should have finalized your registration to the event in 2020 or in 2021 for accessing to the 2021 PCIC Europe virtual event.

You have received by email a secure and personal link (token) which allows you to access the event. Please keep this link secure as this is the only way to attend the conferences. Please note the link can be only used by one person at a time, you cannot be with several people at the same time with the same link.

Due to GRPD regulations, the access to the networking platform is controlled by log in with the information you have received before the event.

Welcome messages

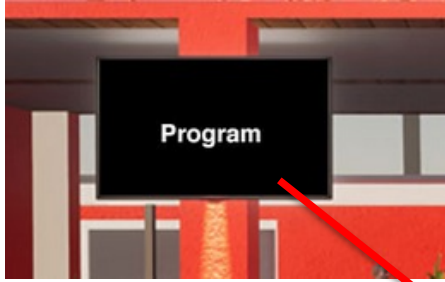

The welcome messages from the PCIC Europe Executive Committee are available during the event.

Welcome messages////////////////////

As the videos are embedded within the event platform you do not have to download anything to watch these videos.

Program

The full program of the event is available from the Program screen.

Program

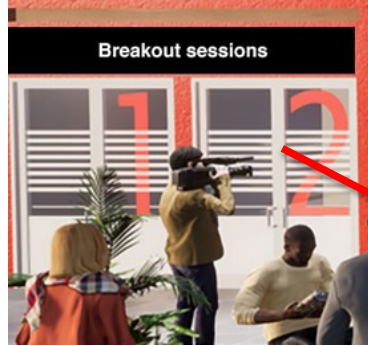

Find here the complete program of the PCIC Virtua1 Event 2021

You can navigate within the program. You will be able to download the presented final papers, to add the sessions you are interested into your calendar, and to rate the presentation.

You can also click on the session room to attend the live broadcast.

Live broadcast

The live broadcast is directly accessed from the program (see previous slide) or by clicking on the numbers 1 (for Auditorium 1) or 2 (for Auditorium 2). Plenary sessions are also available from these 2 virtual rooms.

The live broadcast can be watched in full screen. No need to download anything as the video is embedded. You have also the opportunity to ask questions thanks to the chat box.

17th PCIE Europe Annual Electrical and Automation Knowledge Sharing Event

Differential protection : When ?

For Critical High Power Motors

Motor	Cost (k€)	Operating costs (k€)
Motor without anti-magnetic circuit	200	1 - 3
Motor without anti-magnetic circuit	100	2 - 4

5

PCIE EUROPE

When to use differential protection?

- High power motor (over 5 MW)
- Criticality of the motor in the process (critical, back-up or spare part)
- Accurate & quick fault location to limit damage
- Cost of the overall implementation
 - Number of CT's
 - Type of relay
- Cost and delivery time for new motor vs repaired one
